GIGW 3.0 Compliance

To,
Consulate General of India,
São Paulo, Brazil

WEB ACCESSIBILITY COMPLIANCE CERTIFICATION (GIGW 3.0) TO WHOM IT MAY CONCERN

This is to certify that the official website of the **Consulate General of India, São Paulo, Brazil** (<https://www.cgisaopaulo.gov.in/>) has undergone a comprehensive accessibility audit and subsequent remediation. The platform has been successfully optimized for web accessibility in strict compliance with the **Guidelines for Indian Government Websites (GIGW) Version 3.0** standards.

As of the latest evaluation, all technical errors and accessibility barriers identified via standard automated evaluation metrics (including missing form labels, text alignments, and link configurations) have been completely resolved.

Key Areas of Remediation & Compliance:

- **Core Code & Structural Integrity:** All primary architectural and semantic elements under direct development control—including global headers, proper heading hierarchies (H1 to H6), navigation structures, semantic containers, and image alternative text (alt attributes)—have been validated and cleared of errors.
- **Form Controls & Labels:** Missing form labels and structural alerts across critical entry points have been fixed to ensure seamless navigation for keyboard-only users.
- **Third-Party Integrations:** External application dependencies and third-party widgets (such as the Google Translate dynamic drop-down iframe) function as standard system integrations within permissible GIGW platform validation boundaries.

Conclusion:

The core interface of the website is now fully certified as accessible, responsive, keyboard-navigable, and optimized for screen readers and assistive technologies, providing an inclusive user experience for all citizens.

Yours sincerely,

For **WEBCOLORS PVT. LTD.**
